Subject: Microsoft Settlement

I have read the proposed settlement, and do not consider it fair or equitable. It appears to be simple appeasement towards Microsoft, as well as acceptance and formalization of their unethical and monopolistic practices that have driven so many competitors out of the marketplace. Microsoft has been found guilty, and they still their behavior has not changed. They have attempted to sway states' attorneys general with letters apparently sent by the deceased. It has even been reported that they are trying to tilt the comments submitted during this period in their favor. They have demonstrated their lack of moral fortitude time and time again, and this settlement will allow them to walk away with everything they have ever wanted. Please consider this a vote against the current settlement and a vote to seek a new settlement more favorable to freedom and fair competition.
